

The Cogent Advantage

Exclusively from Cogent, Global Peer Connect is the only way to connect to Global Peer Exchange (GPE). Whether you are a content provider, a carrier / ISP, or even a large Corporation operating its own network with an Autonomous System Number (ASN) Global Peer Exchange enables you to **easily exchange Internet traffic** with any other network, **worldwide**, at **marginal cost** and with **total flexibility**. Through the GPE portal, you can find and connect with other GPE participants, as well as manage your Global Peer Connect ports. Most GPE connections are enabled within one business day. Our service is backed by local customer support centers and an industry leading Service Level Agreement.

Global Peer Connect Interface

Your on-ramp to the Global Peer Exchange

- 10GE ports, 95% burstable
- LAG and Aggregate burst billing available
- No term or bandwidth commitment
- Delivered in any Cogent-Lit Data Center (>1,769 globally)

Global Peer Exchange

Worldwide connectivity platform

- Find and connect with other GPE participants
- Protocol agnostic (IPv4, IPv6, or both)
- Online, automated setup for peering connections
- GPE connections enabled within one business day

Global Peer Exchange

This worldwide connectivity platform enables the exchange of Internet traffic, much like a traditional IXP (Internet Exchange Point). However, GPE is available globally, has no fixed port costs, no distance-based fees, and offers resilient end-to-end connectivity for all kinds of Internet traffic (web, video, corporate VPN).

Connect Locally

Obtain a Global Peer Connect port in the Cogent-Lit Data Center most conveniently located for your traffic. Delivery is available in any Cogent Lit Data Center - 100 Cogent Data Centers and over 1686 Carrier Neutral Data Centers - across 302 markets and 57 countries worldwide.

Peer Globally

Once your Global Peer Connect port is provisioned, connect with any other GPE participant - anywhere in the world, and begin exchanging traffic in as little as one business day. The GPE portal at globalpeerexchange.com allows you to track and accept connection requests, manage your connections and monitor your Global Peer Connect ports, all through a simple, streamlined interface.

The screenshot displays the GPE portal interface with a dark blue header and navigation tabs. The main content area is divided into several sections:

- My Connections:** Includes a search bar and a table with columns: ID, Company, ASN, Their Facility, My Port/LAG, My VLAN ID, My Facility, Request, Regu. By, Regu. Date, Active Date, Disc. Date, Traffic in/out, Status.
- My Ports:** Includes a search bar and a table with columns: Order ID, Type, Speed, Facility, Country, City, Status, Compl. Date, Cancel Date, Connections.
- Participants:** Includes a search bar and a table with columns: Name, URL, ASN, Also Known As, Participant Since, Connection Request, Connections.
- Facilities:** Includes a search bar and a table with columns: Name, Address, Market, Country, Speed.

Each section has a 'Show 100 entries' link and a search bar. The 'Facilities' table shows two entries:

Name	Address	Market	Country	Speed
CoreSite LA3 (One Wilshire)	624 SOUTH GRAND AVENUE	Los Angeles	US	
Digital Realty ATL1 (Ika, Tels MMR)	56 MARIETTA STREET NORTHWEST	Atlanta	US	

Service Locations and Products

Cogent offers a wide variety of service locations, including over 1686 carrier neutral data centers and 100 Cogent Data Centers around the world. Cogent also connects the largest and most prestigious office buildings in North America.

Across our global network, we offer a simple product set, allowing us to specialize in providing you bandwidth.
